

PEEL & STICK NONSKID

PROTECTIVE TAPE FOR MARINE NON SKID AREAS

Spec: MIL-PRF-24667C

BENEFITS OF PEEL & STICK NONSKID

- Can be applied to any dry clean surface
- Can be applied with temperatures as low as 40°F
- No maximum overcoat window
- Engineered for interior or exterior use
- Ready for traffic immediately after installation
- Installation within Ships' Force capability
- Can be maintained, repaired, or replaced quickly, while in port or underway
- No special tools required
- Half the weight per square foot of roll-on epoxy nonskids
- Uniform surface and clean appearance
- Convenient pre-cut sizes for easier handling, installation and replacement
- Reduced maintenance and life cycle costs
- Eliminates rust bleed-through and provides additional protection to applied area
- Chemical resistant
- Strong adhesive
- No ventilation requirements for installation

The peel & stick coarse nonskid is installed over a primed or painted deck and may be installed on all decks, interior and exterior, that are classified as non-critical
